

PARK MANOR THE WOODLANDS SUCCESS STORY

Mr. F. was admitted to Park Manor the Woodlands for intensive wound care, physical therapy, and occupational therapy following a knee amputation. Prior to his hospitalization, he lived at home with his wife and was independent with all functional mobility and activities of daily living.

Upon initial evaluation of our therapy team, Mr. F. required contact guard assistance for bed mobility, moderate assistance for transfers, and was only able to walk up to five feet with the help of parallel bars. He required minimal assistance for lower extremity movements and standby assistance for upper extremity movements.

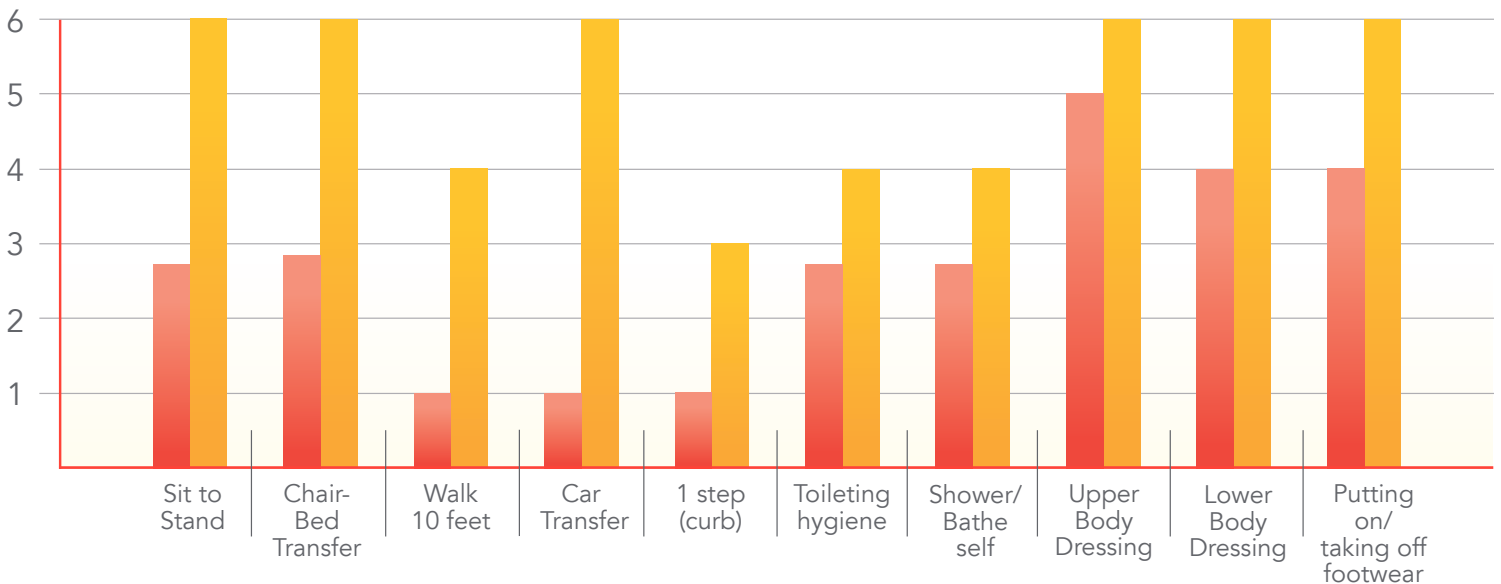

Our experienced therapy team set Mr. F. up with HTX Prosthetics to receive a prosthetic leg after his right lower extremity healed and after three weeks of skilled therapy services, he was able to meet his goals and successfully return home! At the time of discharge, he was modified independent for all activities of daily living and functional mobility at a wheelchair level. He was also able to ambulate with a rolling walker up to 25 feet with contact guard assistance.

We feel privileged to have been able to treat Mr. F. and get him back home with his wife after extensive work with our therapy and clinical team!
